PTF60 – Professional Track 6

Student Name: **Paul Andrei S. Calma**	Date Submitted: Nov. 6, 2026
Program: BS Computer Science	Professor: Sir Andrew Ramos

Final Project

What Does the Knowledge Base Search Use to Rank Notes

Answer

The Knowledge Base search ranks notes using a local keyword ranking algorithm based on BM25, with the parameters k1 = 1.4 and b = 0.75.

Supporting facts

- Search is local keyword ranking with BM25, using k1 = 1.4 and b = 0.75□S1□.

Risks and limitations

The documents don't cover this.

Method: written by a team of AI agents from 0 local documents. Each statement was checked against the source passages (2/4 supported) before it was kept.
